Snapping

Middle mouse button - Ruler

Alt middle mouse - adds a <sup>temporal pivot</sup> ~~middle mouse~~ to that location

Ctrl + middle mouse - drag, change views

Change  www.gamudaland.com.my  
draw 

# Sent to GAMUDA LAND

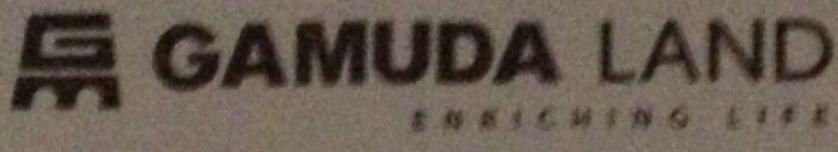

dry dock barge  
with dredging  
syphon

Grindstone left right/but to sand  
instead of dredging sand

Held tide to change bottom

End snap off to clear

Exports - split project late  
Kedah

Virtual cameras - (utkone)

Unreal / remote run (ave), stream to phone  
use ar kit.

As you move through world, cam move too,

• save them into sequence.

Github - Automation Framework

- Auto deploy builds
- Screenshot c.

• screenshot comparison

Procedural foliage tool - spray tree ptc  
activate in experimental

- set collision shape

PIE - soft + O → quickly open assets

Bonuses - greater editor tools via blueprint  
editor

Tools - great visibility by default - save performance  
- consider driver system  
- tool  
- engine  
- engine core  
- pump tick  
- pump tick  
- list all actors ticking  
- set color existing colors  
- phen.

event graph - call in editor mode  
creates an event button in which can  
be called at point

Landscape from material

→ Draw material to render target  
Landscape import heightmap from render target

Press K to keep simulation changes

Content browser search syntax

drag - lock camera to object  
 while dragging  
 style camera movement

Alt+Mouse Left/Right/Both for transform  
 instead of dragging arrow

Alt+Tilde to change between Local and World

End snap object to floor

Imports - split perspective 2 perspective  
 realtime, ctrl middle vc

andscape Grass Node - ability to create a node  
 auto spawns instant mesh  
 grass, ... red

Robo Recall - VR +

Epic release its modkit.

Now you can open robo recall project and see  
its behaviour tree

EQS

- can be run in game or in the editor
- evaluate best position...

Splitscreen support - 13 seconds to setup

- skip assign gamepad  
so just use WASD

Animation Fast path

- optimise variable access inside animgraph
- click optimise blueprint member access in settings
- enable animation blueprint warnings.

Asset Manager Framework

- asynchronously load assets

- useful for making inventory screen,

(font) consider forward renderer - VR ~~renderer~~

- good for limited dynamic lighting. Really good  
for VR

Robo Rec 11 - VR +

Epic release its modkit.

Now you can open Robo recall project and see its behaviour tree

ERPs

- can be run in game or in the editor
- evaluates best position...

Splitscreen support - 13 seconds to set up

- skip assig<sup>n</sup> gamepad  
so pl use WASD

Animation Fast path

- optimise variable access inside animgraph
- click optimize blueprint member access in settings
- enable animation blueprint warnings.

Asset Manager Framework

- asynchronously load assets
- useful for making inventory screen,  
~~conquer~~ + the
- consider forward renderer - VR render
- good for limited dynamic lighting. Really good for VR

Render Noise Functions <sup>77</sup>  
Generate Fractals to textures

Generate dynamic rendering

Use VR to generate 3D textures and effects

Free automotive materials on marketplace

~~Hold V~~

Hold V to enable Vertex snapping  
- useful to make rooms.

Get creative with world position offset

Grow things ~~neighbor~~  
nearby

Search mobile plugins - offsite battery

Optional mobile features Blueprint library

script/novice

[www.gamudaland.com.my](http://www.gamudaland.com.my)

script pos - 1 per pos vix dynamic  
script pos - 1 per pos vix dynamic

Virtural cameras - (intense)

Unreal/remote run (pre), stream to phone  
use or kit.

As you move through world can move fcs,  
Save them into sequence.

Crashbot - Automation Framework

- Auto deploy builds
- Start/stop etc.
- Screenshot comparison

Procedural Foliage tool - sprout trees etc

Activate in experimental

- set collision, shape, number of generated
- trees auto grow
- trees under shade die.

**GAMUDA LAND**

consider disabling shader permutation  
by compiling shaders all the time

and references in Blueprinting  
in Blueprint actually create a reference  
Linepoint  
interface instead if possible

editor  
sign words in VR  
very useful

site AR setup

level instance  
entire level in world with ~~transform~~ offset  
world to meters

~~AM GAMUDA LAND~~

Learning Shader permutation  
using shader all the time

examples to understand  
better actually create  
instead it possible

add 5 in VR

with a transform (65c)

## Sunposition calculator Plugin

- useful for indoor sun/light from window mesh decals
- project decal better e.g spaceship
  - use decal rather than UV for thicker

## Auto LOD Generation with LOD Groups

- generate LOD auto, really useful
- auto setup

## +22 has

- auto generate skeleton LOD
- low latency frame syncing
- optimist input time
- high resolution screens not fool
- click viewport V, higher

## Depth Projected Textures

- A render to texture blueprint
- Engine\Art Tools\RenderToTexture (Blueprint)

Lightweight rigid box character simulation

World compositor tool - for large complex environ  
- split environment into tiles

Scenes of erosion

- minimize geometry reuse

- use particle rollout property

Material functions on layers.

- use a sum of nodes in function and collapse them

- Really useful to use for creating skins

Stencil buffer

... and other assets

# **GAMUDA LAND**

ENRICHING LIFE

Arm

- choose a dorm

- dorm built for olympic athletes in 2002

- sing/double/triple

- Shared kitchen

- Meal plan - vegetarian  
- rustic - mexican  
- taco

- Elevator

- Rooms for parents to stay  
separate

Hotel, the guest house  
where parent stay,  
during  
graduation, sports events

... room ... bed ... certificate

# GAMUDA LAND

ENRICHING LIFE

Moon check

Woh Joss RSA  
Brazil Football Professional athletes  
Entertainment team.

Pines settled in middle of the desert

Snow - something you can't find anywhere else  
skiing  
Very popular destination growing industries for travel

# ECUADOR LAND

1. The first thing you will notice about Ecuador Land is the lush green vegetation. The landscape is filled with dense forests, rolling hills, and clear streams.

2. Another notable feature of Ecuador Land is its diverse animal life. You can spot various species of monkeys, birds, and insects throughout the park.

3. The park's most iconic feature is the hot springs, which are located in the center of the land. These springs are known for their therapeutic properties and are a popular destination for tourists.

4. In addition to the natural beauty of the land, there are also several man-made structures, such as a small hut and a bridge, which provide a sense of history and culture to the area.

5. Overall, Ecuador Land is a beautiful and unique destination that offers a variety of natural and cultural experiences.

# **GAMUDA LAND**

Consider disabling Shader permission  
- stop compiling shader on all the trial

Hard references in Phew's code  
casting in Blueprint actually create a reference  
in Linepoint  
use interface instead if possible

## VR Editor

- design worlds in VR  
- really useful

## Simple AR setup

- Load level instance  
- Load entire level in world with ~~as~~ transform offset  
- VR world to meters
